

TAHIR MUSTAFA

SOFTWARE ENGINEER

Lahore, Pakistan | +923194291096 | tahirmustafa161123@gmail.com | linkedin.com/in/tahir-mustafa-2b385b2b9 | github.com/TahirMustafa-NO-ONE | tahirmustafa.dev

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in full-stack web and mobile application development using React.js, Next.js, Node.js, and Flutter. Skilled in building scalable applications, RESTful APIs, and secure blockchain-based solutions with Solidity and Web3 technologies. Experienced working across relational and NoSQL databases, with a strong understanding of modern development practices and agile methodologies.

EDUCATION

COMSATS University Islamabad, Lahore Campus

Bachelor of Science in Software Engineering

Lahore, Pakistan

Sep 2022– Sep 2026

TECHNICAL SKILLS

Languages & Frameworks	C++, Java, Python, JavaScript, TypeScript, SQL, Dart, Solidity, React.js, Next.js, Node.js, Express.js, Fastify.js, Flutter, React Query, Tailwind CSS, Bootstrap, EJS
Databases & Backend	Supabase, PostgreSQL, MongoDB, SQL Server, RESTful APIs, Mongoose ODM
DevOps & Tools	Git, GitHub, Docker, CI/CD, Microsoft Azure, Postman, VS Code, Android Studio
Blockchain & Web3	Solidity, Hardhat, Web3.js, Viem, Smart Contracts, DApp Development
Testing Tools	JUnit, Selenium, Postman (API Testing), Jira

EXPERIENCE

Software Engineer (Part-Time)

Jan 2026 – Jun 2026

PLASMOCODE

Lahore, Pakistan

- Developed and maintained a full-stack web application using the MERN stack (MongoDB, Express.js, React.js, Node.js), contributing to both backend and frontend development.
- Built responsive, server-side rendered user interfaces with Next.js, improving performance and page load efficiency.
- Engineered a MERN-based wallet integration and management system and handling wallet-related API functionality.
- Integrated RESTful APIs to connect frontend and backend services, ensuring reliable data flow across the application.

PROJECTS

Libera – Decentralized Social Network Platform

Team Project

- Built blockchain-based social platform using Solidity, Next.js, and TypeScript
- Implemented gasless transactions and integrated smart contracts (Web3)
- Developed responsive UI using React and Tailwind CSS

Full-Stack Customer Relationship Management System (Full-Stack)

- Built full-stack CRM using Next.js, Node.js, and MongoDB
- Developed REST APIs and implemented authentication (NextAuth)
- Added lead tracking, task workflows, and invoicing features

Pizza Max–Style Food Delivery App (Full-Stack)

- Developed full-stack food delivery platform using React, TypeScript, Node.js, and Express
- Integrated Strapi CMS for dynamic content and order management
- Designed responsive UI with Tailwind CSS and implemented end-to-end ordering workflow

Meshlix – Decentralized Chat App (Flutter + Web3)

- Built decentralized chat application using Flutter with XMTP protocol for secure messaging
- Implemented wallet-based authentication using Web3Auth and real-time communication via WebSocket
- Designed offline-first architecture with local storage for improved performance and reliability

MorEat – Recipe Book Mobile App (Flutter)

- Developed cross-platform mobile app using Flutter for recipe search, filtering, and management
- Integrated Firebase Authentication, Google Sign-In, and Cloud Firestore for backend services
- Implemented features including shopping lists, saved recipes, and BMI calculator
